<p>Msg 547, Level 16, State 0, Line 161 The INSERT statement conflicted with the FOREIGN KEY constraint "FK__Library_C__Libra__3F466844". The conflict occurred in database "LibraryManagementSystem", table "dbo.Library", column 'LibraryID'.</p>	try to insert values to library_ContactPhone table	<pre>INSERT INTO Library_Contact_Number (LibraryID, ContactNumber) VALUES (3, '12345678'), (4, '87654321'), (5, '21345867');</pre> <p>This is the code that showed me errors, I was entering a different value for LibraryID and after I added the same value that appeared with me in the library table, the code became correct</p>
<p>Msg 547, Level 16, State 0, Line 172 The INSERT statement conflicted with the FOREIGN KEY constraint "FK__Book__LibraryID__44FF419A". The conflict occurred in database "LibraryManagementSystem", table "dbo.Library", column 'LibraryID'.</p>	try to insert value to book table	Here is the same problem. I entered a value for LibraryID that does not match the library table and I got an error.
<p>Msg 207, Level 16, State 1, Line 186 Invalid column name 'M_Name'. Msg 207, Level 16, State 1, Line 186 Invalid column name 'M_Name'.</p>	Here you have added additional data to the database that is not present in the associated table Here I added additional data to the database that is not present in the associated table and I got this error "Invalid column name"	I changed the main table, which is the table Members, and added the same data that I added in its database.
<p>Msg 208, Level 16, State 1, Line 215 Invalid object name 'ReviewBookMember'.</p>	show valuses to ReviewBookMember table	Here I forgot to execute the table ReviewBookMember and when I executed it, the database worked and its value appeared with me
<p>Msg 2714, Level 16, State 5, Line 97 There is already an object named 'CK_Only8Digits_New' in the database.</p>	TO CREATE Staff TABLE ....I got this error alerting me that there is a name identical to the name I used in another database	I used a different name for the restriction.

Msg 2628, Level 16, State 1, Line 258 String or binary data would be truncated in table 'LibraryManagementSystem.dbo.Staffs', column 'Position'. Truncated value: 'L'.	The value I am trying to enter in the Position column is larger than the allowed column size.	I modified the table to change the Position column size to a suitable size, VARCHAR(200).
---	--	--

code if possible
<pre>INSERT INTO Library_Contact_Number (LibraryID, ContactNumber) VALUES (1, '12345678'), (2, '87654321'), (3, '21345867');</pre>
<p>sp_help Members; This is the code that helped me troubleshoot the error.</p>
<pre>ContactNumber INT CONSTRAINT CK_Only8Digits_Staffs CHECK(LEN(RTRIM(ContactNumber)) = 8),</pre>

Position VARCHAR (200) NOT NULL,
